

ProDiscover PRO is a cutting-edge digital forensics solution designed to empower investigators in uncovering critical evidence efficiently and securely. It runs on a forensic workstation, enabling users to capture forensic images, preserve evidence integrity, and analyze data with precision using its extensive toolset.

ProDiscover PRO optimizes hardware resources, including high memory and multi-core systems, to deliver seamless performance. With capabilities spanning Capturing, Preserving, Analyzing, and Reporting, it ensures thorough and reliable forensic investigations.

ADVANCE FEATURES

ADVANCE IMAGING AND EVIDENCE PRESERVATION

- Preserve evidence with NIST-compliant bitstream disk copies.
- Analyze email formats including PST, OST, RFC822, DBX, and **MBOX**.

INTEGRATED INVESTIGATION TOOLS

- Built-in viewers for graphics, emails, registries, Internet history, and metadata.
- Scalable interface Compatible with Microsoft SQL, PostgreSQL, and other databases.

POWERFUL SEARCH AND FILTERING CAPABILITIES

- Live search with Unicode support, Boolean operators, and filters for file type, date, and email fields.
- Analyze slack/unallocated space and specialized data like crypto wallets.

DATA VISUALIZATION AND REPORTING

- Timeline views and deduplication of files.
- Generate reports in multiple formats (HTML, XML, RTF, DOCX, PDF) with hyperlinks for detailed data representation.

AUTOMATION AND CUSTOMIZATION

- Python script support for automation, GUI-based processing, and customizable features tailored to client requirements, ensuring flexibility and scalability.

INTUITIVE, INVESTIGATOR-FRIENDLY INTERFACE

- Designed for forensic professionals, offers a seamless user experience that minimizes learning curves, enabling swift evidence review and analysis for maximum productivity.

COMPREHENSIVE DATA RECOVERY AND ANALYSIS

- Recover deleted files and partitions across FAT, NTFS, Ext2/3/4, and JFS2 file systems from storage devices like hard disks and SSDs.
- Process non-compressed and compressed forensic image files for Windows and Linux.
