INTRODUCTION

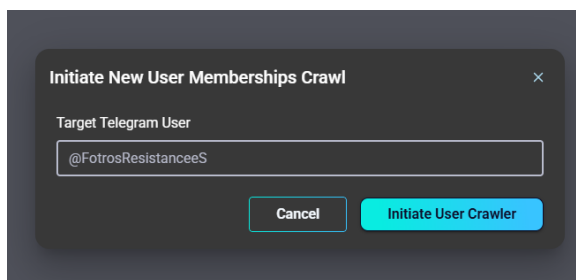

This Document contains an example of an Analyst investigation workflow on the **TITAN** System.

The Investigation began by adding a Telegram Channel called: **Fotros Resistance** (@fotrosresistance) to the collection of the system. The collected data was analyzed by the system and the Analyst, and a specific Telegram User was selected by the Analyst for further Analysis.

WORKFLOW

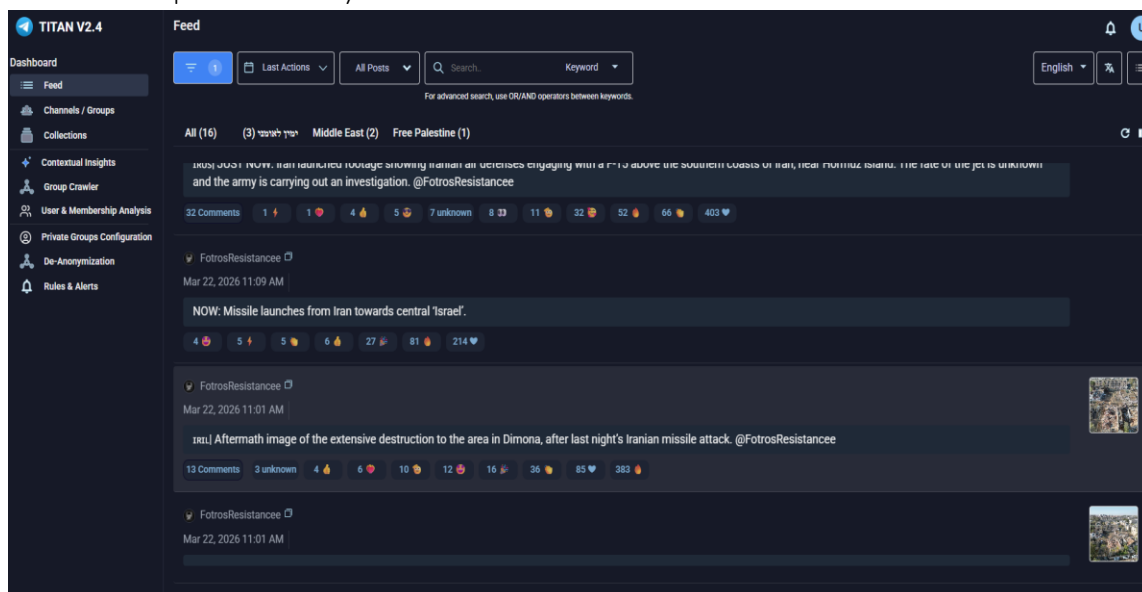

1. Initiate New User Membership Crawl.

The Analyst specifies a name of the Telegram Group / Channel he wishes it to collect from.

2. Monitoring Group messages.

The system will collect and present the current as well as the historical messages of the Group since the day it was created.

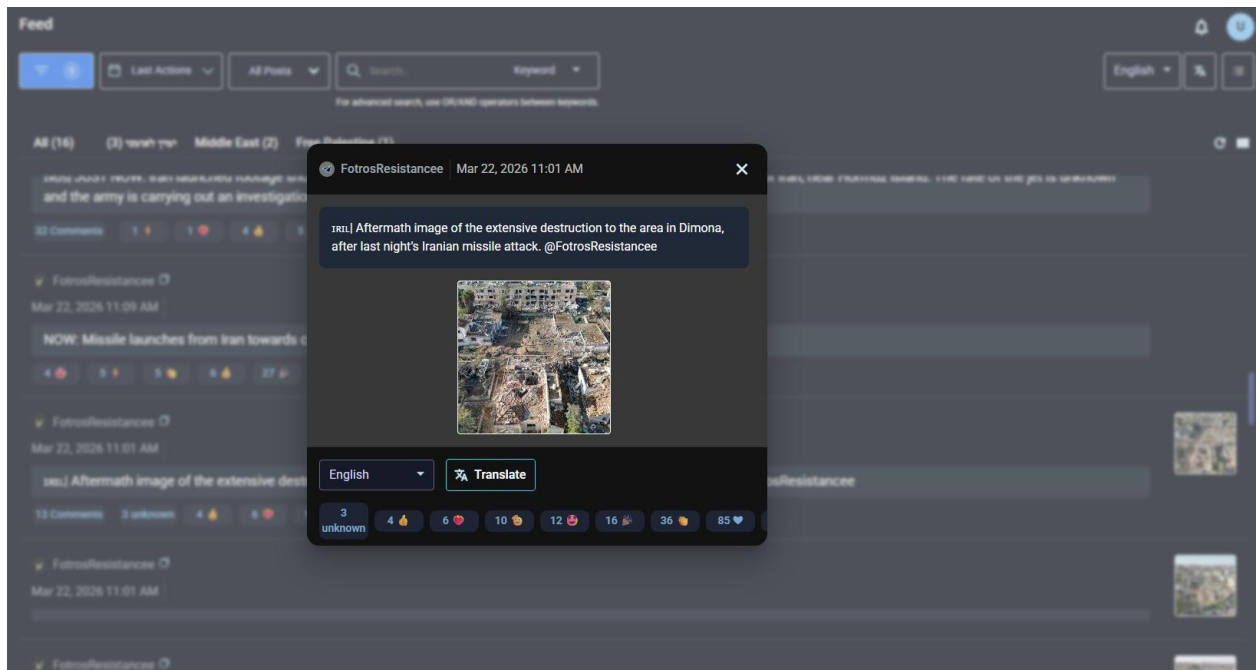

The Analyst can monitor each of the messages in each group, and he can initiate an AI Prompt to summarize a Group main activities, topics and public opinion leaders.

Note: An example of the AP Prompt that was applied on this Group could be found in Annex A of this document.

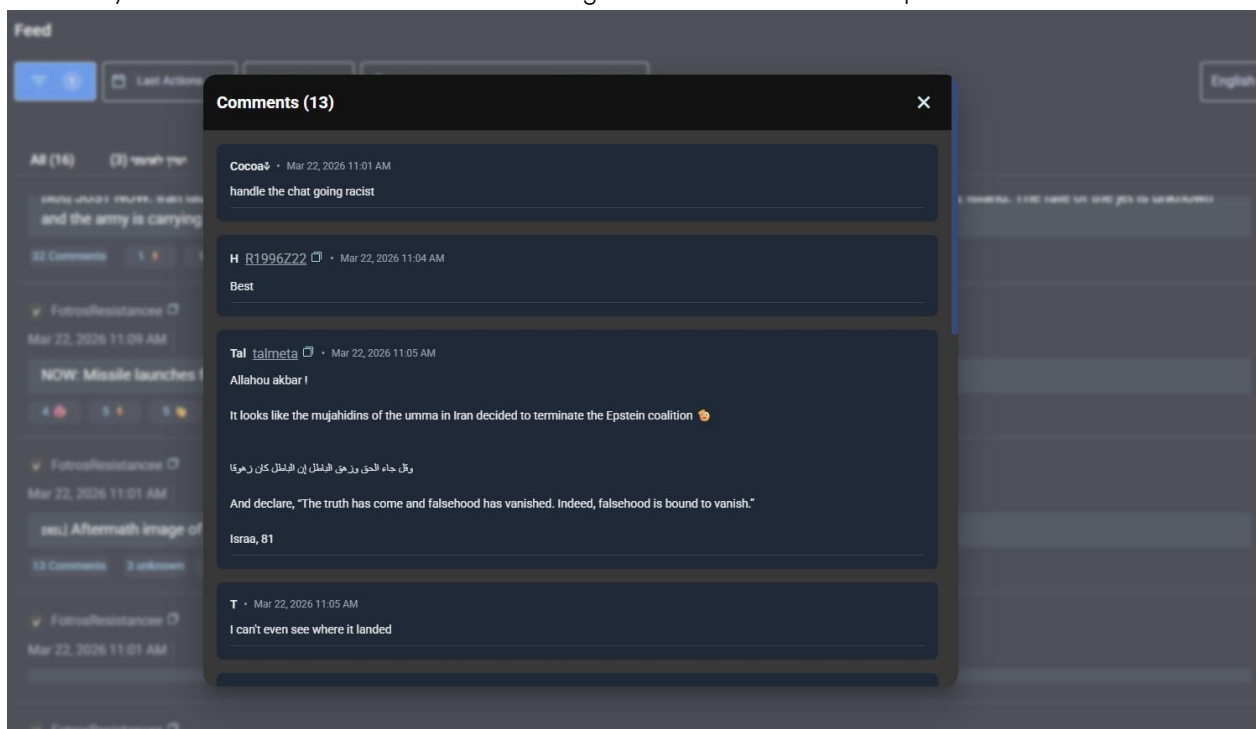

3. Analyzing a Specific Message.

The Analyst can select any specific message within the group, translate its' content, review media files that are included, and receive all the reactions of the Telegram User members to that message.

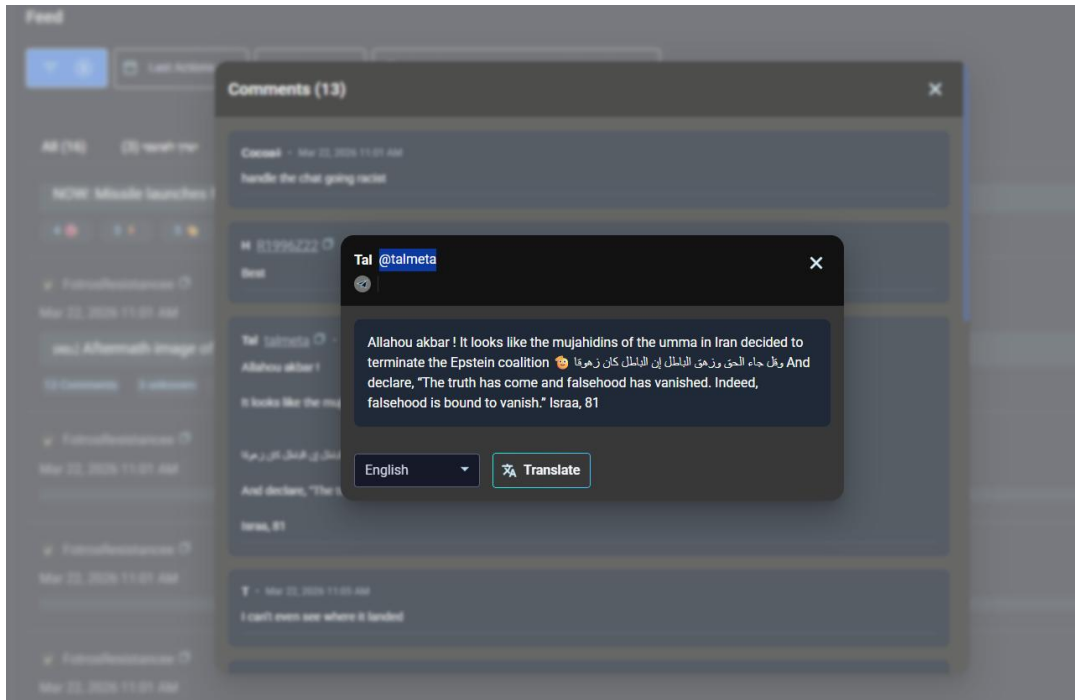

4. Review Post Comments.

The Analyst can review the comments that Telegram Users reacted to the post.

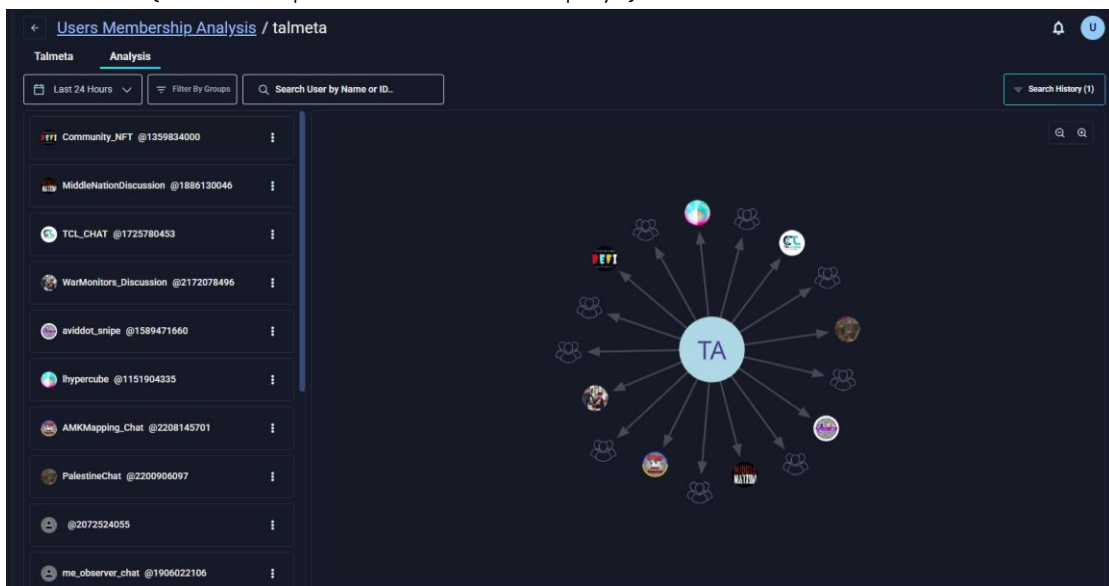

5. Selecting specific Telegram Users for Further Analysis.

After reviewing the Posts and comments, the Analyst can select specific Telegram Users for further Analysis and investigation. This could easily be done by copying their Telegram User ID from the Post or comment in to the User Analysis Module.

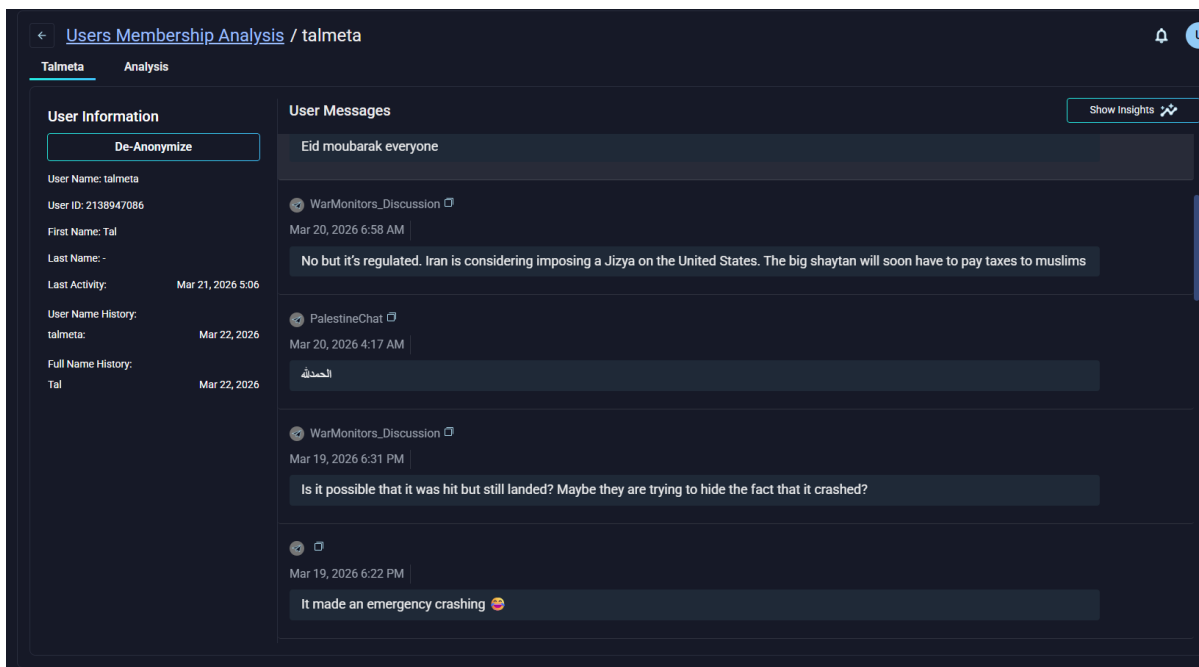

6. Telegram User Analysis – List of Groups.

The System Presents a List of all Telegram Channels and open Groups that the User is a member of. (both in Graphical and in Greed displays).

7. Telegram User Analysis – User Comments and Posts.

The system presents the Telegram User posts and comments within the selected Groups / Channels.

The screenshot displays the 'Users Membership Analysis' interface for the user 'talmeta'. The interface is divided into two main sections: 'User Information' and 'User Messages'.

User Information:

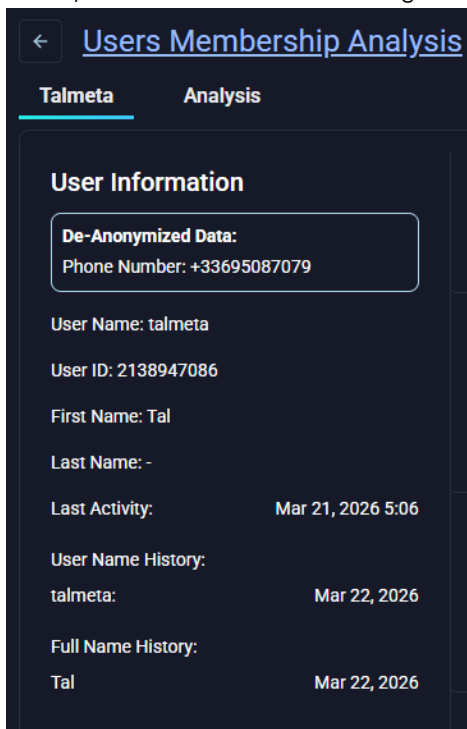

- De-Anonymize:** A button to toggle the de-anonymization feature.
- User Name:** talmeta
- User ID:** 2138947086
- First Name:** Tal
- Last Name:** -
- Last Activity:** Mar 21, 2026 5:06
- User Name History:**
 - talmeta: Mar 22, 2026
 - Full Name History: Tal Mar 22, 2026

User Messages:

- Eid moubarak everyone**
- WarMonitors_Discussion** (Mar 20, 2026 6:58 AM): No but it's regulated. Iran is considering imposing a Jizya on the United States. The big shaytan will soon have to pay taxes to muslims
- PalestineChat** (Mar 20, 2026 4:17 AM): الحدة
- WarMonitors_Discussion** (Mar 19, 2026 6:31 PM): Is it possible that it was hit but still landed? Maybe they are trying to hide the fact that it crashed?
- WarMonitors_Discussion** (Mar 19, 2026 6:22 PM): It made an emergency crashing 🚨

8. Telegram User Analysis – De-Anonymization.

The system can convert the Telegram User ID to an MSISDN and vice versa.

The screenshot displays the 'Users Membership Analysis' interface for the user 'talmeta', focusing on the 'De-Anonymization' section.

User Information:

- De-Anonymized Data:** Phone Number: +33695087079
- User Name:** talmeta
- User ID:** 2138947086
- First Name:** Tal
- Last Name:** -
- Last Activity:** Mar 21, 2026 5:06
- User Name History:**
 - talmeta: Mar 22, 2026
 - Full Name History: Tal Mar 22, 2026

ANNEX A – TITAN SYSTEM LLM SUMMERY PROMPT FOR “FOTROS RESISTANCE” TELEGRAM CHANNEL

****1. Executive Summary****

The dataset reflects a high activity concentration around recent military confrontations involving Iran, Israel, and the US, notably featuring missile and drone strikes, and cross-region attacks. Key events include Iran's claims of intercepting US attack drones, missile strikes causing injuries in Israel, and extensive Iranian strikes on US assets in the UAE and Saudi Arabia, with satellite evidence of damage to fuel storage, radar, and infrastructure. Discussions also include threats of regional destruction by Iranian authorities in response to infrastructure targets. Overall, the dominant narrative emphasizes escalation, attack events, and regional tensions, with significant engagement from user @FotrosResistancee.

****2. Top Topics****

****a. Topic Summary****

- Military engagements between Iran and US/Israel, including drone and missile strikes.
- Iranian attacks on US assets in the UAE and Saudi Arabia, including infrastructure damage and satellite imagery evidence.
- Threats from Iranian officials towards regional infrastructure in response to potential escalation.
- Statements and visits by political figures to attack sites, fueling ongoing conflict discourse.

****b. Top related posts including channel ID and user ID****

- Post ID: -1001971363005, User: @FotrosResistancee
- Description: Reports Iran's navy intercepting US attack drones, missile strikes causing injuries in Israel, and Iranian strikes on US assets.
- Post ID: -1001971363005, User: @FotrosResistancee
- Description: Contains satellite images of missile/drone impacts, damaged infrastructure (fuel storage, radar, data centers), and Iran's threats by Ghalibaf.
- Post ID: -1001971363005, User: @FotrosResistancee
- Description: Reporting ongoing attacks in UAE, Israeli visits to attack sites, and regional escalation comments.

****3. Sentiment Analysis****

****a. Sentiment score:** -75 (indicates strong hostility and critical tone)**

- The dataset contains multiple references to military strikes, injuries, destruction, and threats, with explicit language illustrating hostility toward opposing actors.

****b. Top keywords****

- Iran
- US
- missile
- drone
- UAE

- attack
- damage
- infrastructure
- Saudi Arabia
